

MANUAL

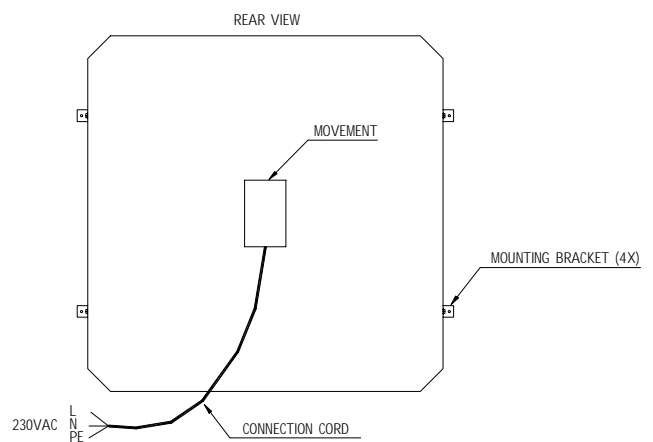

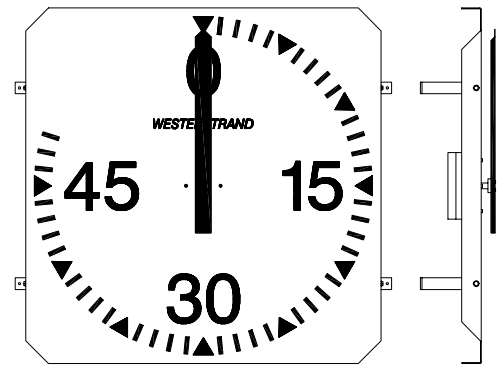

INSTALLATION

The clock is intended for wall mounting.

1. Unpack the clock. Make sure that no part is missing.
The package consists of the following parts:

Board	1 pc
Synchronous movement 230V AC	1 pc
Minute hand	1 pc
Screws Phillips M4x12	4 pcs
Mounting brackets wall	4 pcs
Screws hexagon M6x16	4 pcs
Washers 10.5x22x2	4 pcs
Hexagon key	1 pc
Manual (this document)	1 pc

2. Mount the brackets on the clock inside. Use the enclosed hexagon screws and washers.
3. Place the clock on a suitable wall. Mark and drill the mounting holes.
4. The recommended electrical installation consists of an electric plug, a socket and a switch. All suitable for outdoor use. The clock is not equipped with any built-in mains switch. Note that the electrical installation has to be performed by qualified personnel only.
5. Mount the plug on the clock's connection cord. Note that the protective earth wire is green/yellow and make sure that it is properly connected in the plug.
6. Mount the clock on the wall with suitable screws (not enclosed).
7. Mount the minute hand by means of the enclosed hexagon key.
8. Connect the connection cord to the mains, 230 VAC 50 Hz.
9. Check that the clock is working.

OPERATION

Setting/resetting the clock.

Disconnect the clock from the mains, manually turn the minute-hand to the right position.

MAINTENANCE

The following is recommended for long and trouble-free operation:

- 1) The clock is taken down and stored indoors during the inactive part of the sports season.
- 2) Once or twice a year, applicate a few drops of thin oil on the minute hand shaft bearing.
- 3) Make sure that the oil is suitable for the temperatures occurring.
